

BASEBALL – GREEN PHASE GUIDANCE

1. Gatherings for all games and practices must not exceed 90 people. 2 spectators per person are allowed. Those most vulnerable, to include the elderly, and those individuals who are immunocompromised, should not attend for their own safety.
2. Games and practices should be scheduled with a 15-minute buffer between them to prevent an overlap of participants. Start times should be staggered so no more than half of a complex is changing over at a time. Games may be played to completion.
3. Sharing of equipment is strongly discouraged. Each team should have more than one set of catcher's equipment.
4. Game balls should be disinfected before and after every game and practice. Bleachers will be closed to fans who must bring chairs and socially distance in outfield. Hand sanitizer should be provided for each field, bathroom, and snack bar.
5. No huddles for players and coaches. No "high-fives". Sportsmanship will continue via emotional support. No handshake line after game.
6. No players permitted in dugout. Players must spread out at least six along base line and bring lawn chair. A good separation is every fence pole.
7. Signage at the fields should encourage hand washing and healthy practices.
8. Please exercise your best judgement, if you or a player feels ill, please stay home and/or seek medical attention.
9. It is recommended that each team shall have a temporal thermometer. Two Thermometers will be in the equipment shed for Thomas and in the lock box at Gable. Temperatures of each player and coaches should be checked prior to all games and practices. Anyone with a Temperature >100.4 cannot participate. Please make sure this procedure is followed as it is an early indicator if somebody may be infected or possibly just have a flu.
10. Umpires will be positioned behind mound.
